A NATIONAL COLLECTION OF AWARD WINNING PROJECTS

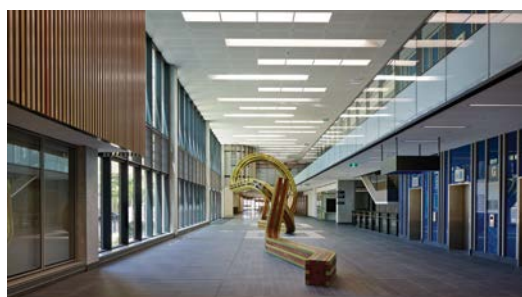

National Commercial Master Builder of the Year
Lend Lease Building Pty Ltd

Queensland
Project Gold Coast University Hospital

Gold Coast University Hospital is a significant public facility, bringing world class health care to the Gold Coast community. As a teaching hospital, it forms the core of University's Health and Knowledge precinct. The hospital provides a range of specialised care to patients, including new and expanded services such as cancer radiotherapy services, neurosciences, neonatal intensive care, trauma response services and cardiac surgery. Located adjacent to the Griffith University Gold Coast Campus, the development is one of the largest health infrastructure projects completed in Australia. The team at Lend Lease can be justifiably proud of their achievement; a worthy winner of 2014 National Commercial Master Builder of the Year.

National President's Award

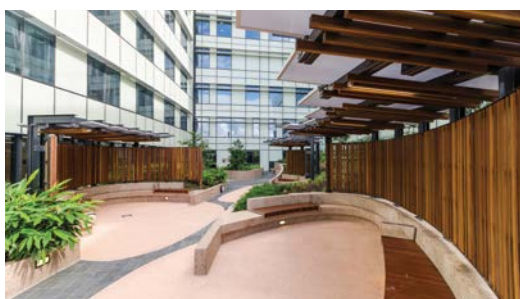

Brookfield Multiplex Construction

Western Australia

Project Fiona Stanley Hospital Project

The 783-bed Fiona Stanley Hospital is Brookfield Multiplex's biggest design and construct project, and the largest building infrastructure project ever undertaken for the Western Australian Government. The hospital's seven buildings and two decked car parks cover a 32 hectare site. The main hospital is a complex design comprising a service tunnel, three podium levels, five ward levels, associated plant-rooms and a helicopter landing pad on level nine. The company's achievement in meeting the challenges presented by the sheer size and complexity of this project is outstanding.

National Public Buildings Award – over \$50 million

Lend Lease Building Pty Ltd

Queensland

Project Gold Coast University Hospital

This new 750-bed tertiary hospital features state-of-the-art facilities designed to cope with the population growth of South East Queensland. The new hospital consists of six separate buildings with a total floor space of around 170,000 square metres. As well as a technically complex internal fitout, the hospital grounds have been designed to be welcoming for staff, patients and the families. In managing the design and construct contract the Lend Lease team was focused on ensuring a shared understanding of the complexities of delivering this world-class facility.
